

Soilmeability : Soil Permeability Solver

"Soilmeability" is an android mobile application which solves your soil permeability equations and problems in Soil Mechanics subject, and helps on the application of soil test laboratory tests.

This mobile application can easily be used by anyone because of its simplicity and user friendliness. Additionally, you can work offline in this mobile application.

Listed below are the following application features:

1. Ability to solve soil permeability formula up to 2 unknowns.
2. Collection of discussions and concepts of formula.
3. Ability to enter systems of variable as the same way as the way you use it. Unlike in mostly available solutions you don't need to format your entire formula of equations.
4. Ability to be transferred app. through Bluetooth.
5. Ability to save print soil test results in your desired sizes of paper through Wi-Fi printer.

"Soilmeability" mobile application was programmed by using java programming language to provide users the compilation of discussions which caters soil permeability formulas and concepts, to make the learning process easier.
